The Platinum™ App

Several shades smarter

Homeowners will enjoy the ultimate in control and convenience with the smart technology of the Hunter Douglas Platinum™ App. Whether from an Apple® or Android™ mobile device, your customers can preset window coverings or groups of window coverings to raise and lower automatically or with a quick slide of a finger. Precisely position shades throughout the home for privacy, security, energy management or to simply set the mood.

KEY FEATURES:

+ Now available for Android devices.

+ Sunrise/Sunset timer feature lets homeowners raise and lower their shades to start or end the day.

+ Operate shades by scene, room or even time of day.

+ Minimal hardware and set-up.

Platinum™ INTEGRATION

HunterDouglas

The Platinum™ App: Convenience At Your Fingertips

With the intuitive Hunter Douglas Platinum™ App, your customers can operate their PowerRise® 2.1 with Platinum Technology and PowerGlide® 2.1 with Platinum Technology motorized window coverings from their Apple® or Android™ mobile devices. With over 20 shade styles and configurations to choose from, Hunter Douglas window coverings match form with function in perfect precision. See technology in a whole new light. Hunter Douglas window fashions in fresh colors and materials feature this customizable technology, bringing a whole new level of style to home automation.

Custom Design Your Ambience

Far more than a remote, the Platinum App is smart technology that gives your customers creative control and the ultimate in convenience from inside the house.
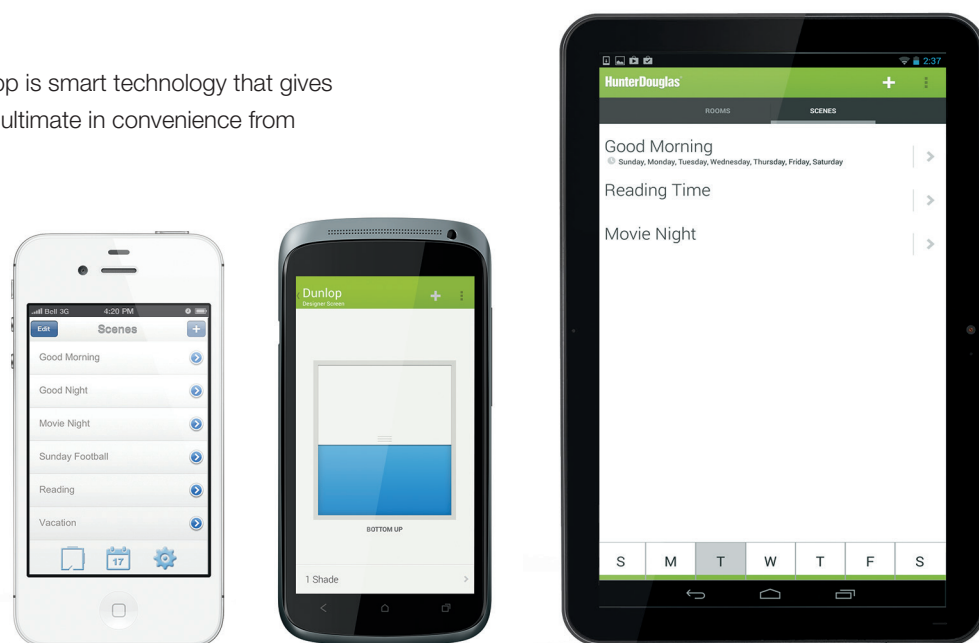

Scenes

Combine different rooms to create "Scenes" that automatically set the mood. Use "Good Morning" to wake up to the soft light of the new day. "Movie" may close every shade to enhance your home theater experience.

Room

Use the customized slider bar on your device to close all the window coverings in the "Master Bedroom" and enjoy a restful night's sleep.

Time of Day

Like clockwork, individual and group window coverings can be precisely positioned for security, energy efficiency and personal preference. The Platinum App timer activates scene commands even when the mobile device is not in the home. Use our new Sunrise/Sunset timer feature to automatically move shades to meet the day or provide privacy at night.

Customers can precisely control their Hunter Douglas window coverings by scene, by room, by time of day.

Rethink remote control. Tap into the power of the Platinum App.
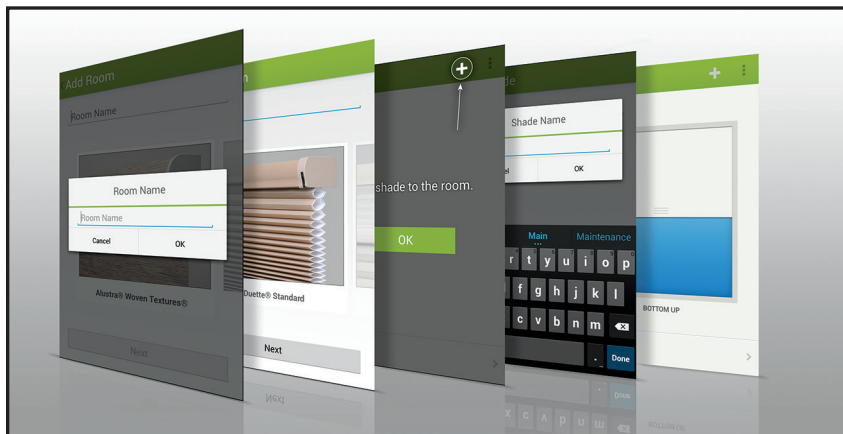

Easy Set-Up in 1-2-3

Whether you have an Apple® or Android™ mobile device, Platinum™ App set-up is easy. Just download the free Platinum App.

Once the app is installed, it's easy to navigate and build your settings by either scene, room or time of day. Customized slider bars make precise control possible with every product and configuration. Set up is a simple slide and tap.

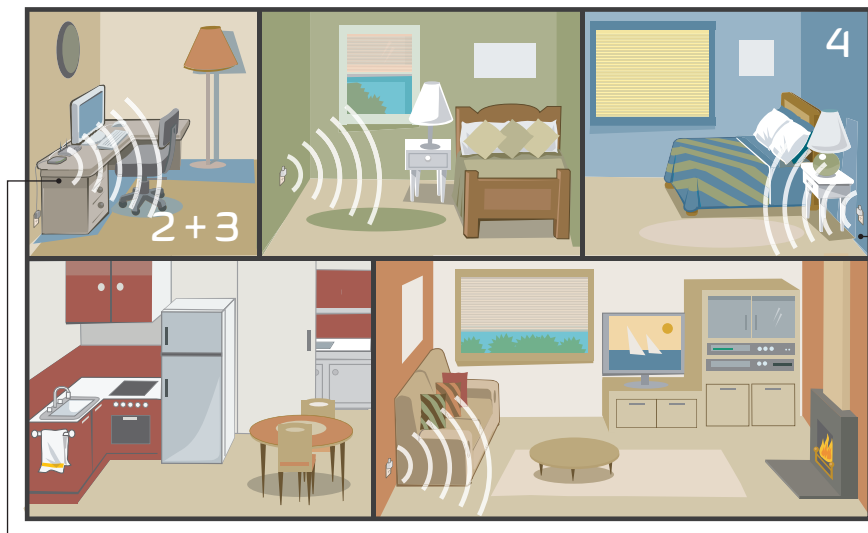

Easy-To-Use: Simple prompts and screens direct users from set-up to operation in minutes.

Sleek, Discreet Components

The Platinum App Bridge, a small hardware unit, is the heart of this wireless system, storing programmed data and sending out operating signals. Platinum Repeaters plug into wall outlets in each room housing a motorized window covering to extend the range of the signal throughout the home.

Your customer can download, and update, the Platinum App for free.

Frequently Asked Questions

Q: How do I know if my Hunter Douglas motorized shades are compatible with the Platinum App?
A: The Platinum App is compatible with all PowerRise® 2.1 and PowerGlide® 2.1 products. This can be verified by the "Platinum App Certified" label affixed to the power cable attached to the shade motor cable.

Q: Why does the Android™ App look different than the Apple® App?
A: Due to differences in operating systems and user interfaces, the apps have different design elements but operate the same way.

Q: Will I need to buy a new Bridge for my Android device?
A: No. The Bridge receives the commands from the Platinum App regardless of what kind of device is being used. Apple and Android products can be used interchangeably with the same Platinum Bridge to control Hunter Douglas motorized window fashions.

Q: Is there going to be a Platinum App for Blackberry and Windows devices?
A: No. At this time the Platinum App will remain exclusively Apple and Android.

Q: How many Platinum Repeaters do I need to operate my shades?
A: Hunter Douglas recommends at least one Platinum Repeater per room with motorized shades to improve signal strength. Additional repeaters may be necessary in the same room for optimal coverage.

Q: Do I still need a Platinum remote or wireless wall switch to operate my shades?
A: A Platinum remote or wireless wall switch is highly recommended in addition to using the Platinum App. These devices act as an alternate control method and a set-up tool (i.e., use the remote to set an intermediate stop position for a shade).

Q: What do I do when my device prompts me to update the App?
A: During an update, do not exit the Platinum App and be sure that your device does not time out or power off because updates are also sent to the Bridge firmware. Be patient and enjoy your new, free features!

**Q: Do I need an Internet connection to set up the Platinum™ App to control my shades?**
A: No, an Internet connection is not necessary for the Platinum App to work. The Platinum App controls Hunter Douglas motorized window fashions over your home network.

Q: What is the range of the Platinum Bridge or Platinum Repeater?
A: In open space without interference, the wireless signals can travel up to 250 ft. In a closed environment, such as a home, range will vary based on household construction and devices being used in the home. Hunter Douglas recommends at least one Platinum Repeater per room with motorized shades.

Q: Can the Platinum Bridge be used to integrate Hunter Douglas window fashions with a home automation system?
A: At this time, the Platinum Bridge cannot be used for home automation integration. Please contact *motorization@hunterdouglas.com* for questions regarding home automation systems.
